Modernizing Mission Operations

Modernizing Operations. Strengthening Mission Readiness.

Federal agencies face increasing mission demands while operating with aging systems, workforce shortages, and growing pressure to improve readiness. TactIQ helps agencies modernize mission operations by improving how people, processes, and technology work together. Our expertise spans supply chain operations, warehouse logistics, operational support, workforce optimization, and intelligent decision support — helping agencies increase efficiency, improve visibility, and strengthen mission execution without replacing existing systems.

SBA 8(a) Certified

HUBZone Certified

OUR MISSION

Helping federal agencies strengthen mission readiness by modernizing operations through operational expertise, intelligent technology, and process optimization.

INDUSTRIES WE SUPPORT

Defense · Civilian Government · Research & Laboratory Operations · Healthcare & Public Health · Agriculture & Natural Resources · Critical Infrastructure · Enterprise Operations

MISSION-PROVEN AT NASA'S JET PROPULSION LABORATORY

Supporting mission-critical warehouse operations, inventory management, logistics coordination, and material procurement at **NASA's Jet Propulsion Laboratory**.

CORE DIFFERENTIATORS

- Proven experience supporting mission-critical operations at NASA JPL.
- Integrates people, processes, and technology in one single approach.
- Combines mission expertise with proprietary operational technology.
- Improves existing systems without requiring costly replacements.

CORE CAPABILITIES

1. Strengthening Supply Chain Performance

We support the movement of people, materials, inventory, and resources that keep mission-critical operations running.

Warehouse Operations · Inventory Management · Material Procurement · Logistics Coordination · Asset Visibility · Operational Readiness

2. Modernizing Operations

We improve how agencies execute work by streamlining processes, modernizing workflows, and integrating technology that increases operational performance

Business Process Optimization · Workflow Modernization · Performance Improvement · Process Automation · Technology Integration

3. Intelligent Operations

We develop intelligent decision support, workflow automation, operational analytics, and resource optimization that help agencies make faster, better decisions.

AI Decision Support · Workflow Automation · Operational Analytics · Intelligent Resource Matching · Decision Intelligence · Digital Process Optimization

4. Enabling Mission Execution

We provide operational professionals who help agencies execute complex programs, maintain continuity, and deliver mission outcomes.

Program Management · Administrative Support · Mission Support Services · Operational Coordination · Workforce Optimization · Resource Planning

STRATEGIC ALIGNMENT — HELPING AGENCIES IMPROVE MISSION READINESS THROUGH

✓ Supply Chain Modernization · ✓ Warehouse & Logistics Operations · ✓ Operational Modernization · ✓ Workforce Optimization · ✓ Intelligent Operations · ✓ Mission Support · ✓ Process Automation

WHY TACTIQ

We don't ask agencies to replace the systems they rely on—we help them get more value from the people, processes, and technology they already have. TactIQ modernizes operations by improving the way people, processes, and technology work together to strengthen mission readiness and improve operational performance.

- ✓ Strengthen mission readiness
- ✓ Improve operational efficiency
- ✓ Increase supply chain visibility
- ✓ Optimize workforce execution
- ✓ Reduce manual processes
- ✓ Improve decision-making
- ✓ Enhance logistics performance
- ✓ Continuous improvement

CERTIFICATIONS

- ✓ SBA 8(a) Certified
- ✓ HUBZone Certified

MISSION EXPERIENCE

NASA Jet Propulsion Laboratory

Supports mission-critical warehouse and logistics operations responsible for inventory coordination, material procurement, warehouse management, and operational continuity supporting one of the nation's premier research facilities.

U.S. Department of Agriculture (USDA)

Supported enterprise workforce modernization and operational transformation initiatives through technology-enabled workforce planning, resource optimization, and program support designed to improve operational effectiveness.

Department of Defense – Mentor-Protégé Program

Developed and deployed an AI-enabled collaboration and decision-support platform that improved partner identification, scheduling, and program coordination.

Food and Drug Administration

Supported nationwide operational programs through data management, compliance support, reporting, operational coordination, and analytical support.

Department of Labor

Developed technology-enabled workforce optimization capabilities that improved resource alignment, placement efficiency, and operational performance.
